

800 Hotline

In this newsletter I would like to ask for your advice instead of giving it out for a change. Your opinion is worth gold, and your time is just as valuable so I will be brief.

We are about to launch a radically different marketing campaign for the New 3D color flock process. We are about two weeks away from having our full inventory of color flock on hand and will be making samples, instruction kits, and providing pricing details to our current machine clients first. In mid to late September, we will launch the process publicly and nationwide.

I would like to ask you for some straight forward feedback before we do this. It will take 3 minutes of listening time to hear our marketing message on a toll free number, and then you can leave your feedback in the voice mail box for us or you can request the info. Be blunt, be honest, don't be shy, tell us what you like and what you don't like, or simply order the free report. Remember, we are still 19 days away from being able to mail it to you and we want your feedback before we go to print. If we have missed a major point let us know!

Special Note to current embossing machine clients: **UNLIMITED LEADS!**

Permaboss.com is going market more aggressively than ever before. More importantly, we will now capture those addresses of people interested in contract work and can refer them to you faster than ever before. **YOU WILL GET MORE LEADS!** We will provide you with the tools and reports for you to use with your name on them so that our efforts also result in business for you.

Did you know that about 45% of people who request information from us only want a contractor and not equipment? You can now benefit from this. Listen carefully to the last 20 seconds of the message to see how we are working to help you!

Yes it is possible that another machine ends up in your market. But don't forget that the embossing market is so virgin. It should not affect you personally, especially with the new tools & weapons you are about to get. It should be no big deal, remember how long it took you to decide before you acted and got your machine, others will do the same. You have that time advantage!

Here is what we are trying to overcome. We made a big mistake in the past. We

used to cater to individual needs too soon. For example we will now start telling EVERYONE ALL the things the machine can do instead of the three or four things we think they might want to do. The fact is that a PB710 can do literally 18 different decorations (you will get a copy of the facts & details with your 3D flock kit or if you order the FREE REPORT).

Here is the ad, please read then call the toll free # and give us your honest reaction?

Would it make you call if I did not ask you to?

Does it spark any interest?

Did we leave something out?
